SUMMARY

Final-year Industrial & Systems Engineering undergraduate at the National University of Singapore with experience in digital transformation, data analytics and process digitalisation. Skilled in SQL, Python, Power BI and automation tools with experience translating business needs into scalable dashboards and digital solutions. Seeking a **6-month or longer internship** opportunity starting in **Jul 2026** to drive operational efficiency and business impact through leveraging data, automation and AI.

EDUCATION

National University of Singapore (NUS)

Aug 2023 - May 2027

Bachelor of Engineering (Honours) in Industrial & Systems Engineering

- Relevant Coursework: Machine Learning, Programming for Data Science, Data Structures & Algorithms, Database Management, Industrial Simulation, Supply Chain Modeling, Digital Manufacturing & Process Optimization, Optimization & Decision Analytics

PROFESSIONAL EXPERIENCES

Global Supply Chain Intern, HP Inc.

May 2025 - Dec 2025

- Built interactive Power BI dashboards to monitor key operational KPIs such as Ship-to-First-Commit and order fulfillment performance, thereby improving first planned ship date accuracy from 90% to currently over 95%. Excel VBA Macro, Microsoft Power BI, Power Query Formula Language (M), and Data Analysis Expressions (DAX) were used.
- Developed and optimized end-to-end data pipelines and automated reporting workflows to consolidate fragmented shipment and factory operations data from SAP S/4HANA across global manufacturing partners, thus improving the overall operational visibility, reporting efficiency and overall supply chain decision-making.
- Supported the early-stage AI transformation initiatives by identifying automation opportunities, structuring operational data and supporting the development of data foundations for predictive analytics and machine learning applications.

TECHNICAL SKILLS

- Microsoft Office Suite: Excel, Word, Powerpoint, Sharepoint, Outlook, Teams
- ERP System: SAP S/4HANA
- Data Visualization: Microsoft Power BI, Tableau, Google Looker Studio
- Data Management & Transformation: SQL (data extraction, transformation, querying), Power Query, Excel VBA Macro, ETL concepts (data cleaning, transformation, pipeline structuring)
- Programming: Python, Java, R
- Automation & Workflow: Microsoft Power Automate, SAP Automate, SAP Signavio

PROJECTS

DSTA Brainhack Hackathon 2024

Jun 2024

- Designed a savings recommendation model using demographic and financial features to classify saver profiles and recommend personalised savings strategies.
- Implemented logistic regression and clustering to identify behavioural segments and visualised insights with Matplotlib and Seaborn for stakeholder interpretation

ADDITIONAL INFORMATION

- Languages: English (Proficient), Chinese (Native), Malay (Proficient), French (Intermediate)
- Hobbies: Hiking, Snorkeling
